NMS UK is a Nurol Holding Company

TACTICAL LIGHT ARMOURED VEHICLE

The indigenous design design of NMS UK, NMS 4X4, features a V-shaped monocoque body. Its advanced drive-train makes the vehicle fast and highly maneuverable at rural and urban areas.

Its low weight and high protection features provide for operational superiority and high resilience in the face of the most aggressive and asymmetric threats. A next-generation vehicle, NMS 4X4 represents a perfect combination of scalable composite material armor. Furthermore, thanks to its higher speed and superior protection features compared to other vehicles in it's segment, the vehicle is suitable as an escort in VIP convoys.

- Air Defence Vehicle
- 2.75" Missile Vehicle
- Personnel Carrier Vehicle
- Armoured Combat Vehicle
- Reconnaissance & Surveillance
- Anti-Tank Missile Vehicle
- Pick-up Double Cabin Vehicle
- Pick-up Single Cabin Vehicle
- Radar Vehicle
- Loitering Munitions
- Mortar Vehicle

General Features

- Personnel carrying capacity up to 11
- Easy embarking and disembarking
- Ergonomic design
- Run flat tires
- Integration of manual or Remote Weapon Station system
- Hydraulic assisted power steering
- Left & right hand adopted gun loops
- Rectifier integrated to the vehicle
- Built-in radio infrastructure
- Quick, easy and low-cost maintenance
- Interior gunpowder smoke evacuation fans
- Integration of different weapon systems

- Mine Resistant Ambush Protected (MRAP) Level Ballistic Protection,
- Mine Resistant Ambush Protected (MRAP) Level Protection mines, IED's & lateral blasts

Optional Features

- Scalable ballistic protection levels
- Central Tire Inflation System (CTIS)
- Chemical, Biological, Radiological, Nuclear (CBRN) Protection System
- Internal Communication System
- Vehicle Front and Rear Camera System
- Day / Night Vision System
- Self-Recovery Winch
- Smoke Grenade Launchers
- Internal Controlled Projector and Announcement System
- Black-out Light System
- Electrohydraulic Back Door
- Fuel Tank; Explosion Proof and Puncture Resistant
- 360° Driver Vision Enhancement System
- Pre-heating System for Cold Environments
- Engine Pre-heating System
- Military GPS and Vehicle Tracking System
- Personnel Cabin, Vehicle, Tire and Engine Compartment Automatic Fire Extinguishing System
